## West Don

### Key 2008 Highlights

A number of key joint project milestones for the Don fields have been achieved on schedule including:

- ▼ Modifications to Northern Producer
- ▼ Mooring of the Northern Producer following tow out
- ▼ Completion of major subsea construction work (including all pipeline laying, installation of mid water arch, riser base and single anchor tanker loading system)

### West Don Field Specific Milestones

- ▼ FDP approval by UK government
- ▼ Securing of the Stena Spey drilling rig to drill West Don field in parallel with Don Southwest field
- ▼ Successful drilling, completion and tree installation of the first oil production well on West Don field

### Key 2009 Milestones

The milestones in 2009 for West Don field will be the commissioning of the Northern Producer; completion and start up of one further production well; initiation of water injection through one injector well; finalisation of all commercial agreements and oil sales arrangements, and the production of first oil from the field.
