## Crawford

### Key 2008 Highlights

The Crawford field has progressed in its development planning with host services negotiations entering their final stages, and a pipeline route survey having been completed as part of the environmental statement needed for the FDP. The FDP is anticipated to be circulated to the joint venture partners in draft format during 2009 and is being finalised for submission to the UK government.

As part of the Crawford field joint venture led by Fairfield, a contract has been entered into with Schlumberger for the provision of well fracture and stimulation services to carry out the planned fracturing scheme on the development wells.

### Key 2009 Milestones

The milestones in 2009 for Crawford field will be to submit the FDP to the UK authorities; gain approval for the FDP and the environmental statement issued alongside it; finalise host service agreements for oil export terms and conditions; commence front end engineering study for the host modifications and conclude the subsea engineering design phase.
